TECHNICAL EXPERIENCE

DATA SCIENTIST - TECH LEAD

July 2023 — Present

Walmart Global Tech

Bentonville, USA

- Designed and developed an autonomous AI Agent to monitor 10M+ forecasts, automating root cause analysis and generating prioritized remediation actions, significantly improving system reliability and reducing downtime.
- Established a centralized MCP server by architecting and implementing a unified toolkit that automated workflows, improved code consistency, and streamlined execution.
- Implemented consistency controls and automated feedback systems to programmatically align machine learning forecasts with business constraints, ensuring model reliability and accuracy in production.
- Drove a strategic initiative projected to save multi-million dollars annually by architecting the transition from node-based to geography-based demand forecasting.
- Spearheaded a cross-functional initiative to unify disparate demand signals, enabling strategic alignment and enterprise-wide demand forecasts.
- Delivered advanced sales and profit forecasting models that improved accuracy by 15%, enhancing data reliability and driving more informed enterprise strategies.
- Engineered a multi-agent system for automated hyperparameter tuning, cutting cloud costs and accelerating ML experimentation by reducing model optimization cycles.

SR. DATA SCIENTIST

May 2022 — July 2023

Merkle Inc.

Atlanta, USA

- Architected and implemented a fully automated, scalable data pipeline that processed terabyte-scale transactional data to identify key sales drivers, empowering stakeholders to formulate business strategies.
- Led the development and deployment of a scalable NLP pipeline to analyze product reviews and customer care transcripts, delivering critical insights that directly guided product development roadmaps.
- Created a robust time series forecasting framework that enabled reliable sales prediction and sophisticated what-if scenario analysis, spurring significant business growth.

DATA SCIENTIST

January 2020 — May 2022

Merkle Inc.

Bengaluru, India

- Pioneered a novel bias mitigation framework using advanced sampling and feature engineering to minimize demographic and socioeconomic bias in machine learning models.
- Drove the development and deployment of a channel optimization model that increased annual revenue by 13% by allocating marketing spend with a data-driven approach.
- Rapidly scaled and launched over 40 customer look-alike models, achieving a 70% average lift in customer acquisition rates across various product lines.

SKILLS

Leadership and Strategy

Team Leadership and Mentoring, Cross-Functional Collaboration, Strategic Planning, Project Management, MLOps Strategy

Specialized Skills

Agentic AI, Machine Learning (ML), Deep Learning, Time Series Analysis and Forecasting, Natural Language Processing (NLP), Big Data Analytics, Statistical Modeling

Cloud and MLOps Tools

Google Cloud Platform (GCP), Vertex AI, Airflow, Docker, Kubernetes, Kube-flow, Git, CI/CD

Programming

Python, PySpark, R, SQL

Machine Learning and Data Libraries

NumPy, Pandas, Scikit-learn, Keras, TensorFlow, PyTorch, SciPy

EDUCATION

Master of Science in Analytics

2022 - 2024

Georgia Institute of Technology

Bachelor of Technology in Computer Science and Engineering

2016 - 2020

Manipal Institute of Technology
